Mountain Weather Forecast

Bannau Brycheiniog (Brecon Beacons) National Park

Forecast valid from 06:00 on Saturday 07 Sep 2024 until 23:59 on Sunday 08 Sep 2024

Forecast Issued on Saturday 07 Sep 2024 at 00:45

Confidence: High for an unsettled theme over the next few days, with the chance of some heavy showers, which could turn thundery. Lower confidence though regarding the timing and intensity of showers. Moderate confidence for a fresher northwesterly airstream to become established early next week.

Headline for Saturday 07 Sep 2024: Fog patches clearing during the morning. Rain turning to showers, perhaps heavy and perhaps thundery.

Forecast for Saturday 07 Sep 2024

Weather: Rather cloudy with some fog patches to start and persistent light rain or drizzle. Fog slowly clearing and cloud lifting a little. A chance of some light showers developing from late morning, then a chance of heavier showers into the afternoon, which could turn thundery into the evening.

Chance of cloud-free hill tops above 600m: 20% or less at first, increasing to around 60% out of showers.

Low cloud and visibility: Fog patches giving poor or very poor visibility at first. Visibility increasing to moderate or good out of showers.

Meteorologist's View

Navigation will be difficult in early fog patches. Take note that thunderstorms feature in today's forecast.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sat 07 Sep 2024	10.8mm	26mm	26mm

Forecast for Sunday 08 Sep 2024

Weather: Unsettled with mostly cloudy skies and outbreaks of showery rain, some heavy and perhaps thundery. Showers easing during the evening, with a few clearer intervals developing.

Maximum wind: N or NE 10 to 15 mph, gusts around 20mph. Becoming more gusty temporarily in any thunderstorms that develop. Wind turning N to NW during the afternoon and evening, increasing 17 to 22 mph, gusts to around 30 mph later.

Chance of cloud-free hill tops 600m: 60% or more, though dropping to 30% or less during some of the heavy thundery showers.

Low cloud and visibility: Moderate or good visibility overall, though perhaps falling to poor in some of the heavier and thundery showers. During heavy showers, cloud could lower to shroud some of the hill tops.

Temperature: **Valleys:** Plus 15 Celsius rising to 21 Celsius.
At 600m: Plus 10 Celsius rising to 16 Celsius.
Freezing level: Above the summits throughout.
